

Higher education and digital skills

Teknosofikum conference: The Future of Digital Technology Education

Kristian Cedervall Laut, Prorector for Education

28 November 2023

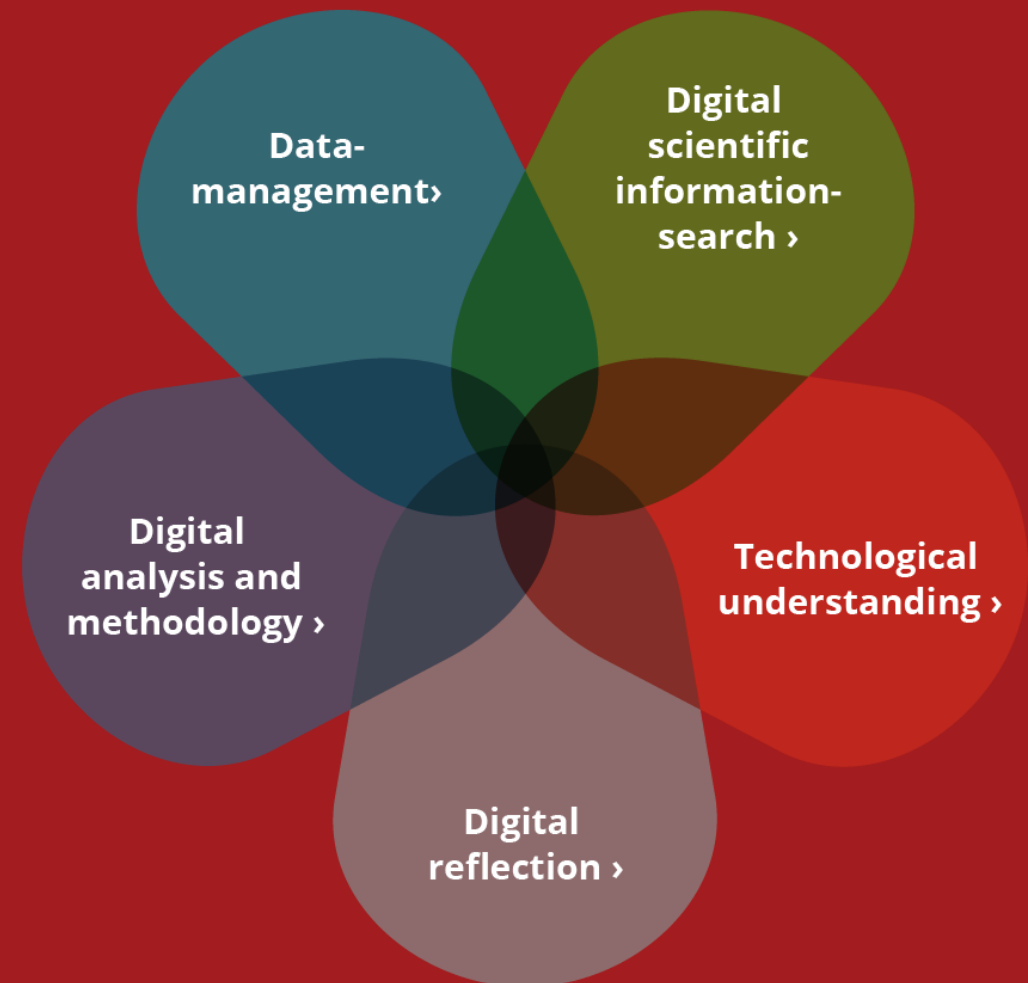

KØBENHAVNS UNIVERSITET

UCPH's model for students' digital literacy and skills

Aim

- To ensure that our BA-students develop adequate digital competences to prepare them for further studies and future employment
- All areas need to be addressed within all educational programs.

Development of teachers' digital skills at UCPH

Courses to teachers – in digital methods, AI, digital text analysis, machine learning etc.

Five data labs - aim to support and strengthen the data science capacity at UCPH

Funding of digitalization activities – we fund ideas on using digital tools and methods in teaching (open calls)

Friction in education is important
