

Art and Materiality of Prompting

In November 2023, Design School Kolding played an active role at the Teknosofikum conference, fostering a vibrant exchange of ideas and collaboration.

Attendees were encouraged to submit prompts for the rapid prototyping of visual concepts for an exoskeleton envisioned by Design School Kolding student, Rosalina Sørensen.

This document unveils the compelling results of this innovative design exercise, showcasing the creative evolution and diverse perspectives inspired by the original exoskeleton design.
